– *causal stuff* –

Causal structure admits notion of time reversal:

$$a \leq^t b \iff b \leq^{-t} a$$

– causal stuff –

Causal structure admits notion of time reversal:

$$a \leq^t b \iff b \leq^{-t} a$$

i.e. ‘**non-signalling**’ is preserved:

$$a \not\leq^t b \iff b \not\leq^{-t} a$$

– causal stuff –

Causal structure admits notion of time reversal:

$$a \leq^t b \iff b \leq^{-t} a$$

i.e. ‘non-signalling’ is preserved:

$$a \not\leq^t b \iff b \not\leq^{-t} a$$

BUT, this is not the case anymore for non-signalling!

– causal stuff –

Causal structure admits notion of time reversal:

$$a \leq^t b \iff b \leq^{-t} a$$

i.e. ‘**non-signalling**’ is preserved:

$$a \not\leq^t b \iff b \not\leq^{-t} a$$

$$R^t = \begin{pmatrix} 1 & 0 & 1 & 0 \\ 1 & 1 & 1 & 1 \\ 0 & 1 & 0 & 1 \\ 1 & 1 & 1 & 1 \end{pmatrix} \because \begin{cases} 00, 10 & \mapsto & 00, 01, 11 \\ 01, 11 & \mapsto & 01, 10, 11 \end{cases}$$

– causal stuff –

Causal structure admits notion of time reversal:

$$a \leq^t b \iff b \leq^{-t} a$$

i.e. ‘**non-signalling**’ is preserved:

$$a \not\leq^t b \iff b \not\leq^{-t} a$$

$$R^{-t} = \begin{pmatrix} 1 & 1 & 0 & 1 \\ 0 & 1 & 1 & 1 \\ 1 & 1 & 0 & 1 \\ 0 & 1 & 1 & 1 \end{pmatrix} \ddots \begin{cases} 00, 01, 11 & \mapsto & 00, 10 \\ 01, 10, 11 & \mapsto & 01, 11 \end{cases}$$

– causal stuff –

Causal structure admits notion of time reversal:

$$a \leq^t b \iff b \leq^{-t} a$$

i.e. ‘non-signalling’ is preserved:

$$a \not\leq^t b \iff b \not\leq^{-t} a$$

$$R^{-t} = \begin{pmatrix} 1 & 1 & 0 & 1 \\ 0 & 1 & 1 & 1 \\ 1 & 1 & 0 & 1 \\ 0 & 1 & 1 & 1 \end{pmatrix} \quad \because \begin{cases} \mathbf{00}, 01, 11 & \mapsto & 0\mathbf{0}, 1\mathbf{0} \\ 01, \mathbf{10}, 11 & \mapsto & 0\mathbf{1}, 1\mathbf{1} \end{cases}$$

When **Bob** inputs **0**, his (i.e. **Bob's**) output is exactly **Alice's input**, so he deduces **Alice's input**.

– *causal stuff* –

1. ***causal structure*** := space-time reachability poset
2. ***non-signalling*** := resulting operational restriction
3. ***causality axiom*** := non-signalling from the future

So how are these notions related?

– process theory = diagrams –

(— & A. Kissinger (2014) *Picturing Quantum Processes*, CUP)

– process theory = diagrams –

(or, a symmetric strict monoidal category)

– *process theory = diagrams* –

states have no inputs

– *process theory = diagrams* –

states have no inputs

effects have no outputs

– *process theory = diagrams* –

states have no inputs

effects have no outputs

discarding :=

– *terminality* –

– *terminality* –

Def. *terminality* of a process theory :=

– terminality –

Prop. TFAE:

(a) terminality,

(b) all effects are discarding,

(c) for each system there is only one effect.

– *terminality* –

Prop. TFAE:

(a) terminality,

(b) all effects are discarding,

(c) for each system there is only one effect.

(or, terminality \equiv tensor unit is terminal)

– *terminality* –

E.g.

- normalisation for probabilities and states
- trace-preserving for CP-maps
- resolution of identity for quantum measurements

– *non-signalling* –

– *non-signalling* –

Def. *A-B non-signalling* of a process :=

– non-signalling –

Def. *A-B non-signalling* of a process :=

Def. *B-A non-signalling* of a process :=

– *non-signalling* –

Def. *non-signalling* of a process theory :=

?

– *non-signalling* –

Def. *non-signalling* of a process theory :=

– *non-signalling* –

Def. *non-signalling* of a process theory :=

⇒ restrict to processes without explicit signalling

– *non-signalling* –

Def. *non-signalling* of a process theory :=

⇒ restrict to processes without explicit signalling

⇒ consider internal causal structure of processes

– *non-signalling* –

Prop. Most general internal structure \equiv

– *non-signalling* –

Prop. Most general internal structure \equiv

– *non-signalling* –

Def. *non-signalling* of a process theory := A-B & B-A
non-signalling of all processes of the form:

– *main result* –

– *main result* –

Thm. For all process theories:

terminality \Rightarrow non-signalling

– main result –

Thm. For all process theories:

terminality \Rightarrow non-signalling

Pf. Recall terminality:
